Sakshi Shewale

LinkedIn: sakshi-shewale05 | GitHub: sakshishewale01 | LeetCode | CodeChef

SKILLS SUMMARY

Languages	C++, Python, JavaScript
Web Development	React.js, HTML, CSS, Tailwind CSS, Node.js, Express.js
Databases	MySQL, MongoDB, PostgreSQL
Tools/Platforms	Git, GitHub, Postman
Soft Skills	Leadership, Problem-Solving, Communication, Project Management, Adaptability

EDUCATION

MIT Academy of Engineering September 2024 – May 2028
Bachelor of Technology – Computer Science and Engineering *CGPA: 8.88*
Relevant Coursework: Object Oriented Programming, Data Structures, Analysis of Algorithms, MERN Full Stack

T.N Raundal College April 2022 – March 2024
Intermediate (Physics, Chemistry, Mathematics) *Percentage: 85.50%*

EXPERIENCE

AI/ML Intern – Cisco June 2026 – July 2026

- Developed **NetSageAI**, applying AI/ML concepts to build a solution for network-related analysis.
- Worked on data preprocessing, model development, evaluation, and visualization to deliver an interactive AI/ML solution.
- **Tech Stack:** Python, Streamlit, AI/ML, Cisco Packet Tracer, Git/GitHub
- **Links:** Live Demo | GitHub Repository

PROJECTS

TeamFlow – Project Management Platform GitHub Link

- Developed a full-stack project management platform for organizing workspaces, projects, tasks, team members, and comments.
- Implemented authentication, protected routes, and role-based access control (RBAC) with workspace-level permissions for Admin, Manager, Member, and Viewer roles.
- Built a Kanban-style task management system and secured workspace data using Supabase Row Level Security (RLS).
- **Tech Stack:** React, Vite, Tailwind CSS, JavaScript, Supabase, PostgreSQL

Conference Review Management System GitHub Link

- Developed a web-based system to manage research paper submissions and streamline the conference review process.
- Implemented a Flask backend with MySQL for paper submission, reviewer management, and review tracking.
- Designed separate workflows for authors and reviewers to support paper evaluation and conference management.
- **Tech Stack:** Python, Flask, MySQL, HTML, CSS, JavaScript

FlowGrid – Logistics & Supply Chain Management Platform *(In Progress)* GitHub Link

- Building a full-stack logistics platform to manage warehouses, inventory, shipments, drivers, vehicles, and routes.
- Developed a FastAPI backend with a layered architecture (routes, services, repositories) on SQLAlchemy and PostgreSQL, with Alembic migrations and Docker deployment.
- Implemented RBAC (Admin, Manager, Driver, Viewer), shipment lifecycle tracking, and logistics analytics, backed by a Pytest suite.
- Currently building the React frontend; ML-based delivery delay prediction planned next.
- **Tech Stack:** React, Vite, FastAPI, SQLAlchemy, PostgreSQL, Alembic, Docker, Pytest

ACHIEVEMENTS

- **Finalist – Trust AI Ideathon 2026:** Selected among 200+ participants as a Top 20 finalist in the national-level event for developing **SentinelAI**.
- **Finalist – Datathon 2026, MIT Academy of Engineering:** Reached the final round with Team HackStack for building an Automated Resume Screener and Job Matcher.
